

Peerless™

The power of a hard drive – in your hand

The power of a hard drive – in your hand

10GB and 20GB capacities!

Information Overload!

Do you have any room left on your hard drive? If so, for how long? In the 21st century it is increasingly difficult to manage the amount of information you are bombarded with every day. It either fills up your hard drive, slows down your server or is difficult to access when you need it.

iomega® helps you to overcome these barriers with Peerless™, a product with the power of your hard drive in your hand. Peerless allows you to store and access large amounts of information on a disk the size of a PDA. The disk slides into a bay station that plugs into your PC or Mac® as easily as a mouse.

Feel secure, be creative, be mobile

With Peerless you can take your files and applications with you – just like carrying your own PC or Mac wherever you go on 1 single disk. 10 or 20GB Peerless disks allow you to develop and manage even the largest graphic, video and audio files at the speed of a hard drive. Peerless also offers you the security of backing up your entire hard drive on a single disk, in an instant.

Peerless: The choice is yours

Peerless offers a multiple range of choices to ensure you have the right capacity and the right connections to any computer you use.

The Media

- 10 and 20GB capacity disks
- Exclusive SealSafe design, protecting the read/write heads inside a sealed disk
- Shock and vibration protection to withstand a 75cm drop
- Chip-based identifier technology for data security from theft or unauthorised access

The Bay Station

- USB 1.1 and FireWire™ modules available
- Fast transfer rate (up to 15MB/sec with FireWire)
- Host powered with FireWire 6-pin
- Simultaneous video streams with FireWire

Solutions for Business

Peerless drive systems are ideal for businesses of any size. Sleek. Rugged. Scalable. Portable. Whether you want to simplify system migration, provide power users with the best tools, or protect the privacy of employee records, Peerless drive systems are the answer. They are the fastest and easiest way to protect your users' data.

Backup can be totally automated.

Restore is a simple drag-and-drop process.

And migrating systems is painless.

In this age of ever expanding storage needs, the infinite capacity and flexibility of Peerless drives and disks makes perfect sense.

Peerless™

The power of a hard drive – in your hand

SYSTEM REQUIREMENTS:

- ▶ **USB Connection Requirements:**
USB Controller (Some USB controllers or motherboards may not support all types of USB devices)
- ▶ **FireWire™ Connection Requirements:**
Requires SBP-2 compliant 1394¹ or FireWire controller
- ▶ 10MB hard drive space recommended. Software suite applications will require additional hard-drive space
- ▶ Must meet minimum RAM requirements for your operating system
- ▶ 4x CD-ROM drive or higher for software installation
- ▶ To use Iomega® software and user's manual: Microsoft® Internet Explorer 4.01 or higher or Netscape Navigator™ 4.5 or higher
