Self-declared Environmental Claim, Rapid Eco Range
In accordance with ISO14021

Rapid Eco

All products, including packaging, that are labelled with the Rapid ECO mark fully comply with the below mentioned minimum requirements.

Product Requirement: Use of Post-Consumer Recycled Plastic

The products within the Rapid ECO Range are made from a high share of post-consumer recycled plastic. Share per item please see below list.

24812500 – Rapid Stapling Pliers Eco black	81% post-consumer recycled plastic from total plastic
24845300 – Rapid Hole Punch ECO black	74% post-consumer recycled plastic from total plastic
24846201 – Rapid Stapler Eco Mini black	95% post-consumer recycled plastic from total plastic
24509000 – Rapid Stapler Eco StandUP black	78% post-consumer recycled plastic from total plastic
24812301 – Rapid Stapler Eco Fullstrip black	76% post-consumer recycled plastic from total plastic
24812701 – Rapid Stapler Eco Halfstrip black	74% post-consumer recycled plastic from total plastic

Product Requirement: Designed for disassembly

Where the "Designed for Disassembly" claim is made, product components are separable manually or with the use of a standard screwdriver. The separated materials (metal or plastic with the correct type-label) can be recycled if a recycling system is available.

Packaging Requirement: Recycled cardboard

The packaging is made of recycled cardboard. The minimum amount of recycled material in the packaging is 70%.
